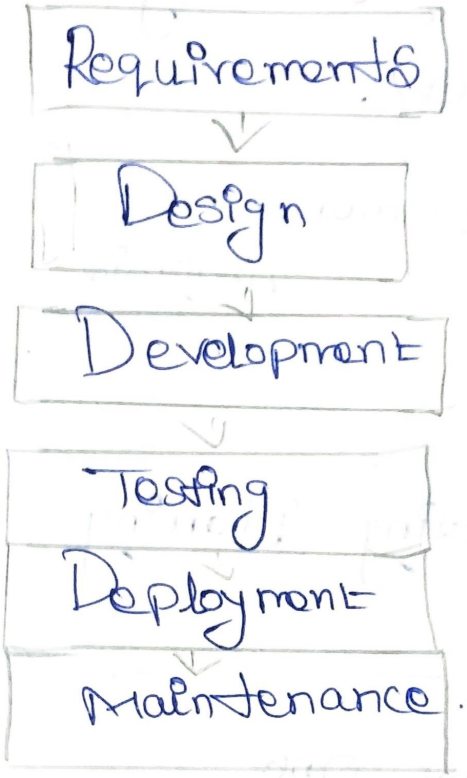
1. Explain about waterfall Model with Daigram:

Waterfall Model:



Requirements:

* Gathering the requirements from customer.

* Preparing list of questions / clarification

* Send the calarifications to the custome through Business Analyst and get it clarified.

* Freezing the requirement.
(last version of BRD)

Design:

* Dev Architect designs the High Level Design document.
* Dev Software Engineer designs the Low level Design document.
* Test Engineer designs the low level Design document.

Coding:

* Software development Process Starts here in this stage.
* Dev team starts to write code
* Developer sends the code for review
* Dev changes the code based on review comments.
* Dev integrates all the modules and gives the complete software for testing.

Testing:

* Testing team starts different types of testing.

* Performs smoke test once the fresh build received from dev team.

* Once the smoke tests is pass the team will continue with full functional testing.

Deployment:

* Dev pushes the complete code to remote repository like Github or some other version control system.

Maintance:

* In this stage, the user or custome may ask for some small changes in the software.

* The changes happening in this stage in this stage in this stage is after the full release of the software product.

The agile model is an interactive and incremented approach to project management and software development that prioritizes flexibility, customer collaboration. and quick delivery.

Scrum
Kanban.

Scrum:

A popular framework that uses fixed length iterations with specific roles (product owner, Scrum master, Development team). and events (daily Scrums, Spring Planning)

MOM - Minutes of Meeting

MOM is document which contains the discussion and action items getraced from the meeting.

Kanban:

Todo -> InProgress -> Done

Backlog -> Todo -> Dev in Progress -> dev done -> test in Progress -> test done -> completed deployment.

Dev:

Backlog: Tasks awaiting assignment

To do: Tasks ready to be picked up.

In Progress: Tasks actively being worked on.

Code Review: Tasks under Review by Peers.

Done: Complete tasks.
